AH11 G/GA/U

AH12 G/GA/U

Reliable HD Audio Quality

The Aries 10 is built with neodymium speakers, supporting a frequency range from 100 Hz to 10k Hz. Its HD audio delivers clear and powerful conversations, and enhances listening experiences.

Featuring 330° extendable boom, the Aries 10 Series ensures precise positioning and enables optimal audio quality.

With ALE's advanced noise cancellation technology, the Aries 10 Series effectively minimizes noise distractions and helps customers focus on their businesses.

Ergonomic Design, Comfortable to Wear

The Aries 10 Series has an ultra lightweight design, only 65g for AH12 G/GA and AH12 U headsets with two speakers, and 50g for AH11 G/GA and AH11 U with a single speaker.

In addition to hearing protection, its large soft foam ear cushions will gently fit users' ears for more comfort.

High Quality, Great Value

Designed for intensive usage, the Aries 10 has gone through stringent and uncompromising quality tests, and it offers a 2-year warranty.

With 2 types of port, the Aries 10 Series offers flexible options based on customers' budget and connectivity requirements.
