

## H3P/H3G Quick Start Guide

Change Language: English by default. Phone UI change path: Menu --> Basic Setting --> Language.

## 1. Configuring network

Dynamic mode by default. Phone UI change path: Menu --> Advanced Setting (default password 123456) --> Network -->IP Config -->IPv4 settings --> IPv4 Mode.

## 2. Configuring account

Users can configure account via phone UI or WEB UI. WEB UI example.

Step 1: Pressing "OK" key to view the IP address

Step 2: Entering https://IP address on the browser. Login with "admin" and password "123456"

Step 3: Configuring account as below

	≡	Account:	Account1	~
Status	~	Account Active:	0	
Count	^	Account Status:	Not registered	
Basic		SIP Label Name:		?
Codec		Display Name:		0
Advanced		User Name:	1234	0
Wetwork	~	Register Name:	1234	0
B Provision	~	Password:		0
Phone Keys	~	SIP Server:	192.168.1.100	0
Setting	~	SIP Server Port:	5060	0

Note: Marked items are mandatory. Please contact service provider for detail.

Step 4: Account status shows "Registered" when the SIP account is registered successfully.
